SPECIAL PROCEDURES: Water spray may be ineffective on fire but can protect fire fighters and cool closed containers. Use fog nozzles if water is used. Do not enter confined fire-space without full bunker gear.

UNUSUAL HAZARDS: Isolate from oxidizers, heat, sparks, electric equipment, and open flame. Closed containers may explode if exposed to extreme heat. Applying to hot surfaces requires special precautions. Empty container very hazardous.

SECTION VI ACCIDENTAL RELEASE MEASURES

SPILL OR LEAK PROCEDURES: Keep unprotected personnel away, ventilate spill area, and remove all ignition sources. Collect leaking liquid in sealable containers and absorb remaining liquid in sand or inert absorbent. Remove to safe place. Do not let this chemical enter the environment.

SECTION VII HANDLING & USE

HANDLING PROCEDURES: Isolate from oxidizers, heat, sparks, electric equipment, and open flame. Use only with adequate ventilation. Avoid breathing of vapor or spray mist. Avoid prolonged or repeated contact with skin. Wear OSHA-approved goggles or face shield. Wear gloves, apron, and footwear impervious to this material. Wash clothing before re-use. Avoid free fall of liquid. Ground containers when transferring. Do not flame cut, saw, drill, braze, or weld. Empty container very hazardous. To minimize static discharge when transferring, ensure electrical continuity by bonding and grounding all equipment. Use an inlet diameter of at least 3.5 inches with a maximum flow rate of 1 meter/second.

STORAGE PROCEDURES: Keep in fireproof surroundings. Keep separated from strong oxidants, strong acids. Do not store above 120 °F. Keep container tightly closed and upright when not in use to prevent leakage.
