

# SERVICE PRO VELOCITY Program

Following the OE vehicle manufacturers' initiative to reduce size and SKU count of spin-on oil filters, SERVICE PRO is pleased to announce the option of a VELOCITY spin-on oil filter line if the installer chooses to stock fewer SKU's without sacrificing vehicle coverage. This filter standardization is driven by common thread sizes and gasket diameters.

SERVICE PRO has created an application guide that provides the installer the option of a CLASSIC or VELOCITY oil filter line. The SERVICE PRO application guide recommends both the CLASSIC replacement filter and the VELOCITY replacement filter wherever possible.

This unique catalog format allows the installer the flexibility to service their customers in the manner they prefer. **Both filters are an appropriate fit for the vehicle where recommended.**

The following CLASSIC models have a VELOCITY option:

SERVICE PRO CLASSIC	SERVICE PRO VELOCITY
M4460A	M4622
M4651	M2500
M291	M2222
M4466	M252
M4670	M195
M49	M5313
M4620	M4622
M4477	M4476
M123	M5288

If you have any questions, please contact your distributor or call the SERVICE PRO Filter Technical Hotline (800) 225-2837.
