## Top Off:

- ✓ Enhance system performance
- ✓ Fill overflow tank to max level to rejuvenate your existing antifreeze
- ✓ Requires 1 Gallon of 50/50

## Drain and Fill:

- ✓ Refresh system to help stop the spread of corrosion and protect against freeze-up and boil-over
- ✓ With cool engine, open drain valve to empty and refill to indicated level
- ✓ Requires 2 Gallons of 50/50

## Flush and Fill:

- ✓ Completely rejuvenate entire cooling system, stopping corrosion and providing ultimate freeze-up and boil-over protection
- ✓ Flush according to directions. Add half the volume of the cooling system with Concentrate. Top off with distilled water until full.
- ✓ Requires 1-2 Gallons of Concentrate Antifreeze

**All products available in concentrate and 50/50**

THIS IS STRICTLY A GUIDE - \* Heavy Duty applications include diesel-powered commercial vehicles or stationary engines with aluminum or other engine metals. \*\*Always consult your vehicle manufacturer's owner's manual to determine the specific maintenance and change-over intervals recommended for your vehicle. UNDER THE MAGNUSON WARRANTY IMPROVEMENT ACT - A manufacturer may not condition a warranty on using a specific product identified by brand, unless the product is provided to the consumer free of charge, or by special waiver from the Federal Trade Commission after the manufacturer has proved that the vehicle engine will not function properly without the use of the specified brand or product.
